

We're so much more than just a **HVAC, Renewables, LPG/Natural Gas, Plumbing** and **Commercial Heating** business...

Vital Heating is a market leading company offering Mechanical, Commercial & Industrial Gas Engineering as well as Renewable Energy solutions for over 20 years; providing a highly reputable service to commercial and domestic clients across the North West and the rest of the UK. **Innovation is at the heart of everything that we do**, and it's our mission to get the job right, the first time, every time!

Our ever-growing **portfolio of successful contracts stretches out over several sectors**

ranging from Commercial & Industrial, Education & Schools, Housing, Local Authority, Farming and more. From a simple domestic Boiler install to high-efficiency commercial Plant Rooms – all our work is carried out to the highest of standards...

*Much love,
the Vital team*

Vital Heating
Solutions

"Vital have been fantastic for us, they have carried out full heating replacements along with reactive repair work. I couldn't recommend VHS enough their Engineers are hard working, reliable and always leave the jobs impeccably clean."

Adam Whalley, Pendle Trust

For over 20 years, Vital have provided an **unparalleled quality service...**

We continue to grow from strength to strength, **with client satisfaction & confidence being at the forefront of our success.** Our customers seek and are delivered by our commitment to outstanding levels of design, supply, installation; but more importantly our customer service and aftercare.

Vital Heating Solutions is an award-winning business, delivering first-time client satisfaction; our reputation in both the private and public domain is built on assuring optimum quality, reliability and efficiency. Our in-house designers and Engineers **tailor each heating system to the individual** property and/or commercial premise(s), thus guaranteeing performance.

Vital's difference to other businesses:

- Award-winning HVAC, Plumbing & Heating solutions
- MCS Certified Installer and RECC accredited
- Renewable energy specialist
- A dedicated customer service team
- We work with you before, during and after your project
- Successfully trading for over 20 years
- Trustmark Registered
- In-house marketing
- Excellent level of communication
- Meticulous quality assurance processes in place

We specialise in **Industrial Plumbing, Mechanical Engineering** and bespoke **Commercial Heating** solutions...

Here at Vital, we provide comprehensive Industrial Plumbing, Commercial Gas Engineering and HVAC solutions for clients across the North West, as well as servicing businesses around the UK. We have experienced Design Consultants and specialist Engineers who cater to all of your Heating & Cooling needs.

Heating, Ventilation & Air Conditioning

We provide effective ventilation systems that work to contribute to your heating and air conditioning systems; increasingly Heating, Ventilation and Air Conditioning are becoming a key component in commercial and industrial buildings.

Underfloor Heating

We provide energy-efficient UFH systems to suit any type of commercial premises, whatever your requirements. Discover how you could install UFH, what the benefits are, and what the best underfloor heating system is for your premises.

Plant & Boiler Rooms

We're the one-stop-shop for all Plant Room installs and Commercial Boiler Room builds; regardless of the work involved from a complete upgrade of an existing Plant Room to maintenance and repairs such as valves, pumps, and gauges.

Commercial & Industrial Gas Engineering

Our expertise covers a wide range of services for our commercial & industrial customers, from planned or reactive maintenance to installation. From Service & Repair Natural Gas Engineering, LPG, OFTEC Engineering to Industrial Ventilation.

We are fully
MCS & RECC
accredited Heat
Pump installers

Renewable energy solutions: **Heat Pumps**

With around a third of the country's carbon emissions coming from how buildings are heated – it's easy to see why Renewable Energy is becoming ever more important! Renewables and low carbon heating systems, such as Ground or Air Source Heat Pumps; help create eco-friendly homes, thus reducing emissions and environmental impact.

A well-designed heat pump system transfers around three times more energy into a property as heat than is used to extract it from the ground or air. As a result, **heat pumps have the potential to significantly lower fuel bills**, particularly in properties without access to mains gas.

Ground and Air Source Heat Pumps are ideal for off-grid properties as they generate more energy than it uses – extracts heating and hot water from the energy stored in the air or ground.

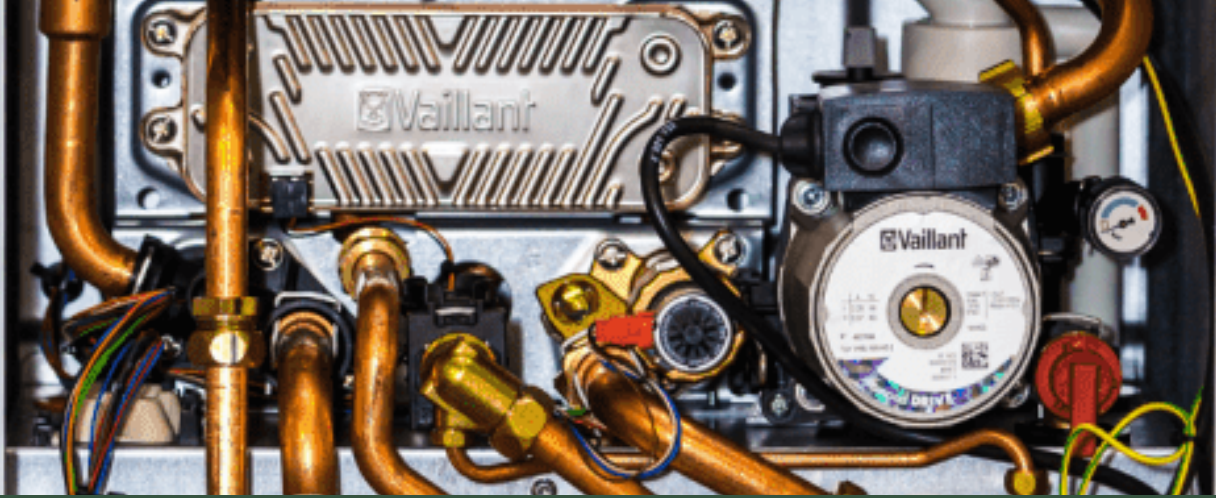

We're the **one-stop shop for all Plant Room installs, servicing and upgrades...**

Regardless of the work involved from a complete upgrade of an existing Plant Room to maintenance and repairs such as valves, pumps and gauges. Our qualified and highly experienced Commercial Engineers can work on all Plant Room sizes and aspects of general maintenance. Whatever your requirements are – we can offer you a truly bespoke solution, tailored to you.

Vital Heating Solutions **design, install and build bespoke Mechanical Plant Rooms** across the United Kingdom. The size of a Plant Room is generally proportional to the size and type of building – large buildings may have several Plant Rooms or spaces that occupy one or more stories and some Plant Rooms may have specific functions...

We have **20+ years of heating homes** throughout Lancashire; **specialising in reactive maintenance and installs...**

We're proud to offer a wide range of services to our domestic customers, whether you require a new boiler installation or a Gas Safety Record, we have you covered! **We collaborate with industry leaders**, such as Vaillant, BAXI, Ideal, Worcester Bosch – to name a few, so you know you're in safe hands!

At Vital Heating Solutions, we continue to grow from strength to strength, with client satisfaction and confidence being at the forefront of our success. Our reputation in delivering domestic projects is built on assuring optimum quality, reliability and efficiency. These are essential requirements our customers seek and are delivered by our commitment to **outstanding levels of design, supply, installations and most importantly our aftercare** and customer service.

Residential heating services we offer:

- Hot Water Cylinders (Unvented & Vented)
- Domestic Plant Rooms
- Underfloor Heating: Installation, Service & Repair
- Boilers, Central Heating & BMS
- Renewable Heat Pumps (Air and Ground)
- Boiler Service & Repair
- Gas Safety Records & Gas Fire Services
- Luxury Bathroom Service
- LPG/Natural Gas, Plumbing and HVAC Services

Pipe Welding Fabrication solutions for the Industrial, Commercial, FMCG sectors; covering all aspects of Process, Hygienic & Energy pipework systems...

At Vital Heating, we can fabricate and erect pipework on-site to your exact specifications, offering a range of pipe specifications for a variety of specialist applications. You can also come to us for a **complete design & installation of gas manifolds**; as we have the knowledge and experience with industrial installs taking customers' requirements from brief to completion, on budget, and on most importantly on time.

We **specialise in all aspects of the design and installation of pipework services** including stainless steel OD dairy, metric, and schedule sizes. Carbon steel schedule sizes, Duplex materials, various plastics either glued, butt fusion, or socket fusion for various substances.

True pioneers in Industrial Pipe Welding...

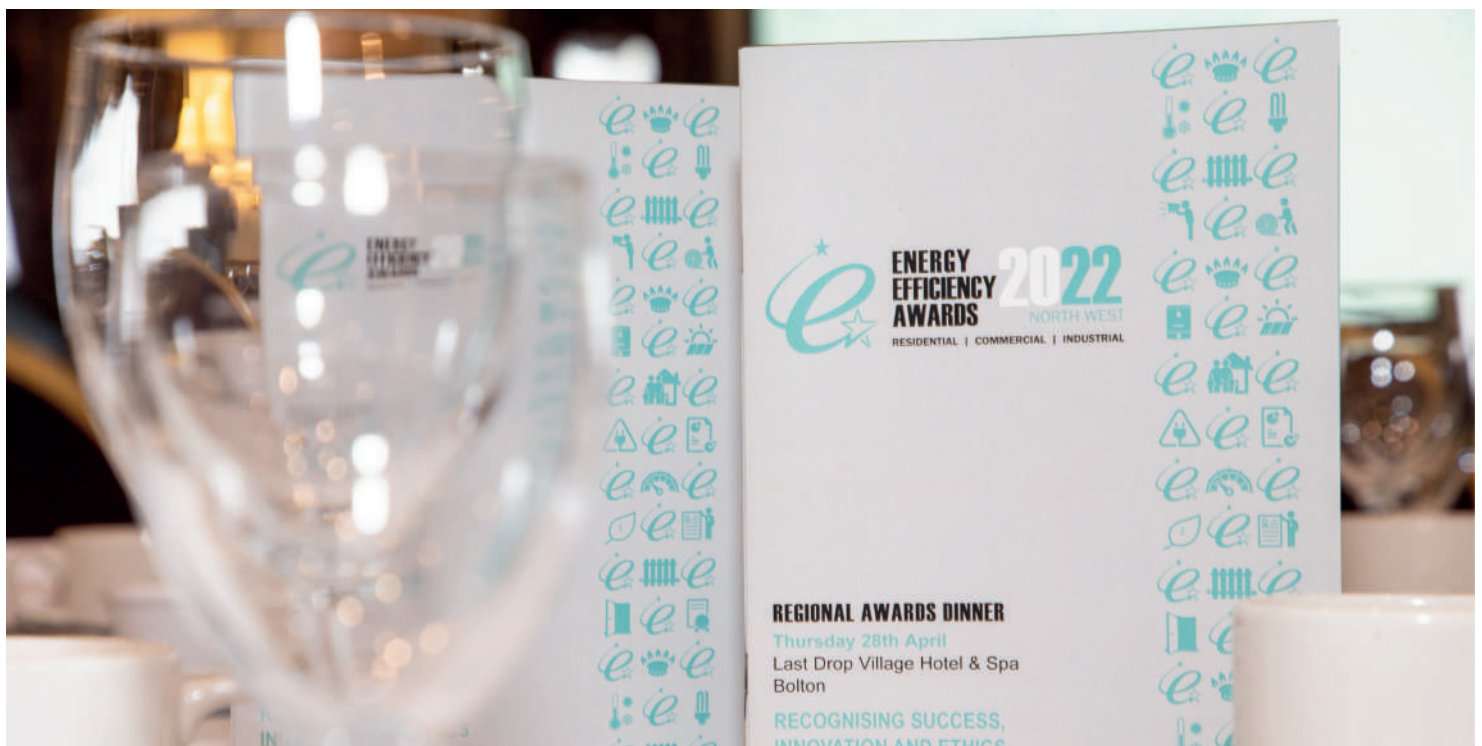

We work closely with our clients ensuring the initial planning process to implementation and aftercare are effectively delivered to the highest of standards and to your needs. **Our capabilities are extensive and include services such as:** Piping Fabrication, Dimensional survey of spools, Welding Fabrication, Pipeline front-end welding, Pipeline back-end welding, Welding engineering and Meticulous QC Inspection.

Congratulations to Dave Heap, our **Managing Director**, for winning at the **Energy Efficiency Awards!**

What a night! Congratulations to all the winners! And a MASSIVE congratulations to our Managing Director for being commended for the 'Business Developer/Director of the Year Award'.

Thank you North West & National Energy Efficiency Awards, we had the best time! See photos below, or check out our social media for reels and more picture highlights from the night.

Meet some of the people doing things the **Vital Heating way**...

Recently, we focused our attention on internal investment. As Vital has grown, we wanted to ensure that we continue to provide a personable and efficient service to our clients, **guaranteeing an outstanding customer experience and journey**... We take great pride in the development of our staff within both our Engineers and Office Support functions.

The Vital team...

We have built an incredible team across a number of different sectors. As a close knit company, there's a family feeling that runs through the work we do; as we understand the importance of a team that's collaborative, inspired and energised.

Case Study: Lord Street Primary School in Colne, Lancashire

The project:

A large traditional two building primary school where a new heating system was required for both buildings, the existing system was tired and inefficient and the boilers were on their last legs as it were.

Vital Heating Solutions designed two new heating systems with modern high and low-level fan convectors for the school; including the installation of two new Plant Rooms (Key Stage 1 building & Key Stage 2 building) with some of the most efficient and innovative gas boilers on the market.

The results:

The school is now benefitting from a fabulous easy to use heating system, after the decommissioning and removal of the existing system we created additional space in many of the classrooms and a warm cozy learning environment for the pupils.

Case Study: The Whitaker Museum in Rossendale, Lancashire

The project:

Vital Heating Solutions overhauled all the mechanical works at The Whitaker Museum in Lancashire, funded

At The Whitaker Museum, we implemented full new heating and plumbing systems, including external and internal ducting, several commercial bathrooms throughout the premises; with the majority of pipework and ducting hidden – ensuring high efficiency, aesthetically pleasing and cost-effective solutions for our valued client.

Client Testimonial: **Simon Butcher,** **Smith's Environmental Products**

Having worked on numerous school and other mechanical projects with Vital Heating over recent years, we have been developing solutions for ever more efficient heating solutions. It is rare to find a company who as Vital, with a willingness and desire to engage in product development with us, Smith's EP. I always look forward to discussing heating controls for fan convectors and devising new ways to interact that delivers enhanced efficiencies.

Regarding schools, Vital Heating Solutions Dave understands the need for centralised heating control to optimise flow and return temperatures using weather compensation and BMS as most competent engineers would. However, under Dave's leadership, Vital Heating and Smith's are working to provide superb, localised control for individual rooms using smart controls. Smart controls enable both teaching staff and Building Managers to interact with the heating system and to produce the optimum comfort levels. The ability to provide accessible controls to all staff means the system operates to its maximum potential.

We have a **vast amount of experience** working across a **variety of sectors...**

Vital are committed to providing renewable energy, commercial heating & plumbing solutions to public and private sector projects; promising to **save both energy, carbon emissions and costs for our customers**; and we fully understand the many challenges, opportunities, funding options and regulations.

It's our mission is to **produce clean and efficient renewable energy solutions** across all of industries we work in...

We collaborate with the following sectors:

- Education & Schools
- Development
- FMCG
- Commercial & Industrial
- Farming & Agriculture
- Housing & New Builds
- Leisure
- Local Council & Authority
- Warehousing & Factories
- Office Premises

We're so proud to be **accredited by** and to **collaborate** with industry professionals...

Here at Vital Heating Solutions, our fully qualified and experienced team of industrial, communal and commercial & domestic Gas Engineers are on hand to assist you with your plumbing, heating or renewable technology needs and/or issues.
